# MedianTracker (draw the picture and arrays)

- Draw the picture and the arrays for the following:
  - Add the following elements to the MedianTracker (in this order):
    - 5, 10, 15, 20, 25, 30, 35
  - What is the result of the call to `get()` after adding all the elements?

```

class Tracker {
    PriorityQueue<Integer> pq1 = new PriorityQueue<>{Collections.reverseOrder(Integer::compare)};
    PriorityQueue<Integer> pq2 = new PriorityQueue<>{Integer::compare};
    void add(int n) {
        if(pq2.size() == 0 && pq1.size() == 0) {
            pq2.add(n);
            return;
        }
        int current = get();
        if(n >= current) {
            pq2.add(n);
        }
        else {
            pq1.add(n);
        }
        int sizeDifference = pq2.size() - pq1.size();
        if(sizeDifference > 1) { pq1.add(pq2.poll()); }
        else if(sizeDifference < -1) { pq2.add(pq1.poll()); }
    }

    int get() {
        if(pq2.size() == pq1.size()) { return (pq2.peek() + pq1.peek()) / 2; }
        if(pq2.size() > pq1.size()) { return pq2.peek(); }
        else { return pq1.peek(); }
    }

    public String toString() {
        return "" + pq1 + " " + this.get() + " " + pq2;
    }
}

```
