## **Q1** Instructions

0 Points

To receive full credit on this quiz, you must score at least 50%.

The Github repo for Lecture 19 is at: https://github.com/ucsd-cse12-w21/ucsd-cse12-w21.github.io/tree/master/lectures/lecture-19

## **Q2** BST

1 Point

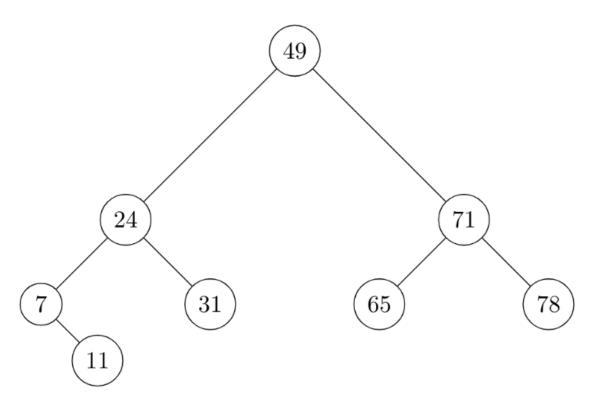

What are the best and worst case time complexities, respectively, of adding a new value to a BST, where n is the number of nodes in the tree?

- $\bigcirc$   $\Theta(1)$ ,  $\Theta(\log(n))$
- **O** ⊝(1), ⊝(n)
- $\bigcirc$   $\Theta(\log(n)), \Theta(n)$
- $\bigcirc$   $\Theta(\log(n)), \Theta(\log(n))$
- $\bigcirc$   $\Theta(n)$ ,  $\Theta(n)$

## **Q3** BST Traversal

1 Point

What is the first node that will be visited in a post-order tree traversal of the BST below?

- **O** 7
- ① 11
- **O** 24
- **O** 71
- **O** 78
